The course of wool prices is shown in Table 26. The average price realised for greasy wool sold at Sydney auctions in the year ended June, 1935, was 9·7d. per lb., as compared with 15·8d. per lb. in 1933-34, and 8·5d. per lb. in 1932-33.

3. WHEAT.

The area sown with wheat for 1934-35, according to returns of wheatgrowers in December, was 4,125,598 acres, including 3,848,927 acres for grain. Progress returns of wheat received for disposal indicate a total harvest in the vicinity of 49,000,000 bushels for the season 1934-35. On 10th August, 1935, the quantity of wheat grain stored in silos and on railway premises was 15,956,000 bushels. Of this quantity, 5,747,000 bushels were on sites in the Metropolitan Area.

* See note below.

Numerous commodities were exempted from tax as from 1st September, 1932, 26th October, 1933, and 1st August, 1934. Consequently, many traders dealing exclusively in exempt goods ceased to supply returns and the proportion of wholesale trade covered by the records has been progressively reduced. The figures for the four periods delineated above cannot be compared without allowance for this fact.

* State Government banking transactions suspended. Index not ascertainable.

†Exclusive of certain abnormal Government transactions.

The index may be regarded as an approximate measure of changes in the volume of business transactions settled by cheques provided it is considered in conjunction with changes in price levels. It represents the ratio of each month's clearings to the average for the month concerned during the five years 1926-1930. This average is represented by 100 each month. Seasonal fluctuations have thus been eliminated. Casual fluctuations in monthly index numbers have been smoothed out by taking a three months' moving average, that is, the index shown above for each month is the average of the actual index of that month and the preceding two months. It may be compared vertically or horizontally.

The index is adjusted to eliminate the effects of Treasury Bill and other special transactions on behalf of Governments and the effects of bank amalgamations. No adjustment has been made for normal growth or change of price levels. The amounts of clearings shown are the recorded totals less Treasury Bill transactions only.

* Including new mortgages and renewals as registered.

† Totals for months are approximate and aggregate differs slightly from annual total.

The average monthly transactions for period 1925-1929 were:—Sales, £4,619,000; and Mortgages, £4,042,000.

NOTE.—Mortgages and liens in some instances secure fluctuating advances, the amount of which is not recorded in the legal instruments. The amounts shown relate substantially to mortgages of fixed amounts for fixed periods, and exclude fluctuating advances (such as overdrafts) secured by mortgage. Mortgages providing collateral security of subsisting mortgages are included.

In the year ended 31st July, 1935, mortgages, exclusive of those providing collateral security, amounted to £13,620,000, as compared with £11,423,000 in the corresponding period a year previously.

24. STOCK EXCHANGE INDEX (SYDNEY).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and the group averages are the means of the average monthly prices per £ of paid-up capital. The aggregate index is the average for the whole of the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio of the average prices of ordinary shares to their par values; adjustment being made where capital is written off or bonus shares issued.
